General Overview

In this transversal course we will work on the five language skills (listening, speaking, reading, writing and interacting) using meaningful topics for teachers such as innovative métodos, tips, tools for managing the classroom, games and gamification...

These activities will have a double aim: on the one hand they will try to be examples of activities we can do in the classroom and, on the other hand, they will try to be a starting point for using English, practicing it and, therefore, improving it.

The course will be essentially practical and we will be expecting the trainees to infer the theory.

The course will be practical. We will work from the examples and we expect the trainees to do an effort outside of the training course to reflect upon the activities we develop in the class so they can understand the theories and techniques behind the examples we will have experienced.
